Flower and Vegetable Seeds

1921

F. R. PIERSO
Tarrytown, N. Y.
Telephone: 48 Tarrytown
To any post office in the United States, at catalogue prices, all Flower and Vegetable Seeds in packets, ounces, and quarter pounds.

When seeds by the pound and upwards are ordered to be sent by mail, postage must be added at parcel-post zone rates. A quart of Peas, Beans, or Corn weighs two pounds. Canadian shipments require 12c. per pound or fraction thereof for postage.

When sent by freight or express, purchaser pays transit charges on all Seeds in bulk, Fertilizers, Insecticides, and Greenhouse and Garden Supplies, except where otherwise noted.

We make no charge for boxes, packing, or cartage, except where Peas, Beans, and Corn and Grass Seed are ordered in large quantities, when 75c. extra must be added for every two bushels to cover cost of bags.

New customers, unknown to us, who desire to open accounts, must give satisfactory references as to their responsibility.

Orders from unknown purchasers, unaccompanied by remittance or satisfactory references, will be shipped by express C. O. D.

Remittance can be made with perfect safety by check, post office or express money order, or cash can be sent in registered letter; fractional parts of a dollar in postage stamps.

Cash should never be sent in unregistered letters. Under no circumstances will we assume any responsibility for the safe carriage of money sent in unregistered letters.

Our seeds are tested seeds of the very best quality obtainable, and our prices are fixed at the very lowest rates consistent with high quality. While we exercise the greatest care to have all our seeds pure and reliable, we give no warranty, expressed or implied, and will in no way be responsible for the crop. If purchaser does not accept our goods on these conditions, goods must be returned at once.
A large percentage of our flower seeds is grown in Europe, and, owing to existing conditions, some varieties may be late in reaching us. When ordering, please state whether we may substitute other equally good varieties in place of those that we may be out of. Without any definite instructions, we will use our judgment in making the best possible substitutions.

SWEET PEAS, Spencer Varieties
There is such an endless variety of sweet peas, many of which have been superseded by newer and much better varieties, that we have omitted all except the very best and choicest varieties. We believe that the varieties we offer include the very choicest and most desirable.

America Spencer. Flowers are white ground, striped crimson, borne three or four on long, stiff stems. Pkt., 20c.; oz., 75c.; 1/4 lb., $2.25.

Blanche Ferry Spencer. Bright rose-pink, wings creamy white, tinted rose. A superb variety, and a great favorite on account of its lovely color. Pkt., 15c.; oz., 60c.; 1/4 lb., $2.00.

Countess Spencer. A beautiful variety. An immense flower of a very lovely shade of pink, deepening at the outer edge. Pkt., 15c.; oz., 60c.; 1/4 lb., $1.75.

Dainty Spencer. A most beautiful pink-edged variety. Flowers pure white, daintily edged rose-pink. Stems are long, and usually carry four large waved flowers each. Pkt., 20c.; oz., 75c.; 1/4 lb., $2.25.

SWEET PEAS, Spencer Varieties—Continued

Fiery Cross. An entirely different shade in sweet peas. The flowers have the appearance of live fire, the colors being fiery red or rich orange-scarlet. Flowers are beautifully waved and fluted, and are borne freely on long, strong stems. Pkt., 20c.; oz., 75c.; ¼ lb., $2.50.

Flora Norton Spencer. A fine bright blue sweet pea. Produces three to four flowers to the spray, on long, thick stems. Not so large as the other Spencers, but fine. Pkt., 15c.; oz., 60c.; ¼ lb., $2.00.

Florence Nightingale. The finest and largest lavender Spencer sweet pea. Color is a soft, clear, rich lavender, which is enlivened by a very faint sheen of rose-pink. A robust grower. The stems measure twelve to sixteen inches in length, and a large proportion bear four flowers each. Pkt., 20c.; oz., 75c.; ¼ lb., $2.25.

George Herbert Spencer. Flowers are of the largest size, bright rosy carmine, usually borne four on a stem. Pkt., 20c.; oz., 75c.; ¼ lb., $2.50.

Helen Lewis. A fine orange-pink variety of the Countess Spencer type, with the same large-sized flowers. Best of this color. Pkt., 20c.; oz., 75c.; ¼ lb., $2.25.

Hercules. A magnificent soft rose-pink flower, of large size and substance. Similar in color to Countess Spencer. Pkt., 15c.; oz., 60c.; ¼ lb., $2.00.

King White. The finest of all white sweet peas. The flowers are of the Spencer type, of gigantic size, pure white, of good substance, produced on long, strong stems, usually four flowers to the spray. Fine for exhibition. Pkt., 25c.; oz., 90c.; ¼ lb., $3.00.

Margaret Atlee. Rich glowing pink on cream ground, softly suffused with salmon. Pkt., 15c.; oz., 60c.; ¼ lb., $2.00.

Mrs. Cuthbertson. An exquisite sweet pea of the Spencer type, of gigantic size. The standard is a clear rose-pink; wings white, slightly flushed rose. The stems are long, and usually have four flowers each. Pkt., 25c.; oz., 90c.; ¼ lb., $3.00.

Mrs. Hugh Dickson. A charming variety of the Spencer type. Color rich pinkish apricot on cream ground, shading lighter toward the center. A vigorous grower. Pkt., 15c.; oz., 60c.; ¼ lb., $2.00.

Mrs. Routzahn. Flowers are of the Spencer type, very large, crimped and waved. Apricot ground, suffused with delicate pink, deepening toward the edges—a beautiful shade. Pkt., 15c.; oz., 60c.; ¼ lb., $2.00.
SWEET PEAS, Spencer Varieties—Continued

Othello Spencer. The flowers are waved, or crinkled, both standard and wings. Color rich, deep maroon. Strong grower. Pkt., 15c.; oz., 60c.; 1/4 lb., $2.00.

Primrose Spencer. Flowers very large, primrose, or creamy yellow. Equal to Hon. Mrs. Kenyon in depth and richness of color, but better in form and size. Pkt., 15c.; oz., 60c.; 1/4 lb., $2.00.

Vermilion Brilliant. This splendid Spencer variety is a strong, sturdy grower, producing flowering stems twelve to fifteen inches in length, bearing three to four flowers each of the largest size. Perfect in form, waved and fluted. The wings are the same intense scarlet as the standard, making a uniform self-color throughout. Absolutely sun proof. Fine for exhibition or garden. Pkt., 15c.; oz., 60c.; 1/4 lb., $2.00.

Wedgewood. A beautiful variety of the orchid-flowering type. Flowers lovely light blue—a color long sought for in sweet peas, and one that will be welcomed by lovers of this popular flower. The flowers are waved, and are borne on long stems. Pkt., 15c.; oz., 60c.; 1/4 lb., $2.00.

VEGETABLE PLANTS

For convenience in handling them, the early cabbage, cauliflower, egg plant, lettuce, pepper, and tomato plants are grown in baskets. When grown in this way, the individual plants can be cut out when transplanted, and they are practically equal to potgrown plants. This is a decided benefit to the purchaser.

ASPARAGUS
Palmetto. Selected three-year-old roots. $3.00 per 100.

CABBAGE
Early; ready in April (transplanted). Grown in baskets.
Early Spring. Early Jersey Wakefield, Henderson’s Early Summer. Baskets containing 12 plants each 35c. per basket.

PIERSON'S PERFECTION LAWN GRASS SEED

The best mixture made for lawns, grass plots, etc. Nothing adds so much to the beauty of a country place as a well-kept, velvety lawn. In order to secure this, it is necessary that the proper grasses should be sown. More disappointment results from sowing inferior seed than from any other cause. Our Perfection mixture is composed of the finest American grasses in proper proportions of such kinds as are best adapted for our hot, dry summers, and will form a close, velvety lawn very quickly after being sown. Oats should never be sown with our mixture, as our seed comes up quickly and strong, and is better without them. For new lawns, use four bushels per acre. One quart will sow 300 square feet. ½ lb., 25c.; lb., 45c.; 5 lbs., $2.00; 21 lbs., $7.35; 100 lbs., $32.00.

OUR SPECIAL MIXTURE FOR GOLF LINKS OR "PUTTING GREENS"

This mixture will be found to be unexcelled. It contains the finest grasses, which make a close, firm, green, and lasting turf. ½ lb., 28c.; lb., 50c.; 5 lbs., $2.25; 21 lbs., $8.40; 100 lbs., $36.00.

OUR SPECIAL MIXTURE FOR SHADY LAWNS

A mixture of fine grasses that are best adapted and most suitable for growing in shady places, under trees or close to walls where there is little sun. ½ lb., 28c.; lb., 50c.; 5 lbs., $2.25; 21 lbs., $8.40; 100 lbs., $36.00.

OUR SPECIAL MIXTURE FOR HAY AND PERMANENT PASTURE

Much heavier hay crops can be produced and much better pasturage obtained where a mixture of the best grasses for these different purposes is used than when only one or two sorts are sown. We believe that the mixture offered by us will give particularly heavy crops of hay, and, after that, will afford most excellent and luxuriant pasturage, and will remain in good condition for a great length of time without the necessity of re-seeding. Our mixture will be found unexcelled for this purpose, and we can recommend it with the greatest confidence. It should be sown at the rate of three bushels per acre, or, if quick results are wanted, a larger quantity can be sown. The thicker the seed is sown, the sooner a fine, close turf will be obtained. 21 lbs., $5.00; 100 lbs., $21.00. 42 lbs. in a bag. Bags, 75c. extra. If sent by mail, postage must be added at parcel post zcne rates.

**FERTILIZERS**

**PURE BONE MEAL**
Quick acting and immediately available, for which reason it is largely used for mixing in potting soil and for top dressing roses, carnations, and other plants grown under glass. It is also splendid for garden use. It is made from hard, dry bone, is perfectly pure and entirely free from acid, and can be used with perfect safety in any quantity. We use it largely in our rose soil, and have found it the very best grade of bone for the purpose.

10 lbs., 80c.; 25 lbs., $1.50; bag (100 lbs.) $5.00; 200 lbs., $9.00.

**BLOOD-AND-BONE**
A high-grade fertilizer of superior quality. Very desirable for quick or lasting results. Particularly valuable for all garden and farm crops, small fruits, fruit trees and grass plots.

10 lbs., 80c.; 25 lbs., $1.50; bag (167 lbs.), $7.50.

**CLAY’S FERTILIZER**
A celebrated English fertilizer for garden and greenhouse use. Highly concentrated.

5 lbs., $1.25; 25 lbs., $5.00; 112 lbs., $16.00.

**HUMUS**
A natural plant food and soil enricher. Rich in organic matter. Excellent for top dressing lawns and grass plots or for mixing with soil in making new lawns, and, as it is odorless, it is also an ideal mixture for greenhouse use. It is also used extensively in the flower and vegetable garden. While humus is an excellent fertilizer, it will not produce the same results as our Bone Meal or other fertilizers which have more enriching qualities, and which, therefore, are necessarily higher priced.

Bag (50 lbs.), $1.50; bag (100 lbs.), $2.50; ton, $30.00. Carload lots (minimum car 30 tons) in bags, $16.00 per ton; in bulk, $12.00 per ton; f. o. b. shipping point; purchaser to pay freight.

**LAWN DRESSING**
For enriching lawns and grass plots. Highly concentrated; clean and cheap. Use at the rate of half a ton per acre.

10 lbs., 80c.; 25 lbs., $1.50; bag (167 lbs.), $7.50.

**PULVERIZED SHEEP MANURE**
An excellent natural manure. Very desirable for top dressing or for mixing with the soil for greenhouse or garden use; also for top dressing lawns, grass plots, etc., and for making liquid manure.

10 lbs., 80c.; 25 lbs., $1.50; bag (100 lbs.), $4.50.

Irris the use of fussing along again this year with your garden, worrying because it's cold and you can't put seeds in; or when the seeds are in and the plants up, it's so cold they won't grow? Garden right this year.

Buy some Garden Boosters, or Frames, as some call them. Plant your seeds in them and have fine, husky plants ready for setting out at the time you used to be putting in seeds. Put some of these Boosters over your rhubarb and have "Garden Sass" a couple of weeks earlier. Do the same with asparagus. Start melons and cucumbers in them. When it gets too warm to keep the glass on, substitute ordinary mosquito netting, and protect your vines against those pesky yellow striped bugs that destroyed your vines last year. Put some Boosters over your hardy flower plants and boost them along and have flowers before any of your neighbors.

Whatever you do, don't put off buying your Boosters.

The only way to have an early garden is to start gardening early.

Plant Boosters

Here is just the handy little booster you have been looking for, to set over single plants of either flowers or vegetables.

They are sturdy little chaps 11 1/2 x 13 inches, and are made of 1/2 inch cypress securely bolted together by cast iron corner cleats. The glass slips down to give ventilation.

Melon Boosters

The real reason for melon boosters is to get better melons—not only earlier, but better. Better, because by getting them started earlier, the roots have a chance to get thoroughly established before the blistering summer suns come to dry out the ground. It's the surest way to get melons with that true melony flavor.

But by no means is their use limited to melons.

Try them over your rhubarb—or to start seedlings in, or to call forth earlier blooms on your daffodils.

Junior Boosters

This is a go-between size—being made for sash 34 x 38 1/2 inches. They are larger than the melon booster, and smaller than the standard ones, shown on the next page.

The sashes, weigh about 17 pounds, which is as heavy as a woman can handle with ease. For having handy by on the southern side of your house, for starting things a couple of weeks earlier than with the smaller booster boxes, they make a fine fix.

Used as hot beds with manure below the soil to furnish heat, you can easily get a running jump of four to six weeks over outdoor plants of vegetables or flowers.

Standard Boosters or Sun Boxes

These are the regular so called “garden size.” They are made for our standard 3 x 6 feet sash. Depth of frame in front is 8 inches; at the back 16. The wood is cypress 1\(\frac{1}{4}\) inch thick. The corners are bolted together by special heavy cast iron corner cleats.

The rafters or rails for supporting the sash are 3 x 3 inch cypress, rabbeted for the sash to slide on. They are equipped with a drip groove for carrying off the condensation, which in many cases would be an injury to the plants should it fall on them.

Dovetailing the rafters into the front and back of the frame makes it easy to take them out to give greater freedom when putting in new soil, or throwing out the old

We constantly keep in stock 2, 3 and 4 sash frames. Orders for other sizes will be promptly made up.

This shows the parts of the two sash frames already for bolting up—which is a very simple matter.

The sash are 3 x 6; sturdily made to last a lifetime. This size gives you 36 feet of planting space.

A four “sasher” gives you a little inside garden 72 feet square.

It will open your eyes when you see all the things you can grow in this, early in the spring, and keep growing way late in the fall.

In fact, some have violet blooms from them all winter long.

Hints on Vegetables

These Garden Boosters will boost anything and everything that grows in your garden, from radishes and lettuce to asparagus and rhubarb.

So you see it's a question of your deciding what you most want early.

Four Ways

You can go about it four ways.

1. Plant the seeds directly in them and later transplant to your regular garden.

2. Leave the plants right in the frames and when warm enough, lift the frames off.

3. Or, as with last year's parsley that has wintered over, put the booster over a few plants. Likewise over the asparagus and rhubarb.

4. For extra, extra early Swiss chard greens, plant the seeds in August and when frost starts nipping, put on the frames.

If so tall it hits the glass, build a simple underframe of old boards and set the frames on top.

Later on bank around with leaves or manure. In hard, freezing weather cover the glass with mats, straw or leaves, putting boards over them.

Hints on Flowers

As for the daffodils, jonquils, iris, and the like, just set your frames over the clump put on the glass and you will be delighted to see how early the blooms will come.

Hardy Flowers

Of course any of your hardy flowers, from forget-me-nots to hollyhocks, can be given a merry hustle.

Pansies

And as for pansies, you can have their chirping blooms not far from the return of the first robins.

Cosmos

With boosters to start your cosmos in, all bloom uncertainty will be past. They will bloom long before Jack Frost nips them.

Violets

You can have violets from October to April.

Annuals

And as for annuals, well anything you want early, plant the seeds early in the frames. That's all there is to that.

It will be a revelation to you, the hundreds and hundreds of plants you can grow for early setting out.

Enough for yourself and the neighbor on each side of you.

Such sharing, you will promptly agree, is not the least of gardening joys.

Care and Fare

These are just a few little things about the successful use of Boosters, which you might like to know right here and now.

Soil

First, it's just common sense that your soil should be rich and friable.

By friable, we mean free working—not "packy."

Watering

Likewise, that seeds need water when in the boosters, as much as in the garden. In fact more, because of the heat concentrated by the glass.

Do it gently at first, so as not to wash the seeds all in bunches. But don't water until you push your finger in the soil and find it's dry down in. Then water enough to water down in.

Air

When the days warm up, let in a crack of air—gradually more and more until you leave the glass off all day and put it on only coldish nights.

More plants are ruined in boosters, because of too little air than too much.

Pot Seeding

Such things as corn, cucumbers, melons, sweet peas, and such succulent rotted things had best be planted direct in small berry baskets or 3-inch pots. It's the only way you can transplant them without the disastrous disturbance of the roots.
